EDUCATION

Acadia University

Bachelor's of Science, Computer Science

Wolfville, Nova Scotia

Sept 2022 - Present

- **GPA: 3.45**
- **Dean's List** Scholar 2024–2026
- Expected Graduation December 2026
- Relevant Coursework: Software Engineering, Database Systems, Human-Computer Interaction, Business Processes in IT

SKILLS

- **Programming:** Python, Java, JavaScript, TypeScript, HTML5, CSS3, C, C++, C# – developed and tested in UNIX/Linux and Windows environments
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Tailwind CSS, Django, Django REST Framework
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools:** it, GitHub, VS Code, IntelliJ IDEA, REST APIs, GraphQL, Postman, MS Office
- **Software Development Practices:** SDLC, Agile/Scrum, code reviews, unit & integration testing, CI/CD, incident triage & resolution, technical documentation

WORK EXPERIENCE

Junior Developer (Co-op)

Mabel Systems

(Remote), Nova Scotia

Sept 2025 - Sept 2026

- Developed and shipped production full-stack features using **Go, React, TypeScript, GraphQL, and PostgreSQL** for seafood traceability software serving **50+ enterprise customers**.
- Designed and implemented **GraphQL resolvers, database schema changes, and React interfaces** supporting inventory, receiving, production, grading, and shipping workflows.
- Developed and tested features across **web and tablet applications**, debugging issues involving GraphQL APIs, SQL queries, database migrations, and application state.
- Wrote **unit and integration tests**, participated in peer code reviews, and contributed to Agile sprint planning and CI/CD deployments.
- Collaborated with engineers and operational stakeholders to translate business requirements into maintainable technical solutions and resolve production issues.

Full Stack Developer (Co-op / Part-Time)

Colibri Software

(Remote), Nova Scotia

Sept 2025 - April 2026

- Built responsive web applications using **TypeScript, Next.js, React, and Tailwind CSS**, translating business requirements into production-ready features.
- Integrated and tested **REST APIs (OAS 3.0)** for managing **500+ points of interest**, categories, media, and user data.
- Implemented API error handling and testing improvements that reduced dynamic content retrieval errors by **20%**.
- Collaborated on UI/UX decisions and stakeholder feedback to improve usability and deliver features aligned with product requirements.

Junior Software Developer (Intern)

HIVO

(Remote), Nova Scotia

May 2025 - Sept 2025

- Added new features using JavaScript, TypeScript, React, and Node.js, supporting real-time dashboards for **200+ users**.
- Built and tested REST API integrations, improving platform data interactions and reducing load time by **20%**.
- Implemented frontend components and dynamic dashboards for real-time data visualization, increasing engagement by **30%**.
- Contributed to unit testing and bug fixes, improving platform reliability to **99% uptime**.

Front End Developer

(Remote), Nova Scotia

Freelance

Jan 2023 - May 2025

- Developed responsive web applications using HTML, CSS, JavaScript, and React.js for **10+ clients**, improving user experience.
- Built reusable UI components, reducing development time for client projects by **25%**.
- Collaborated with clients to refine requirements and deliver solutions, achieving **95% client satisfaction**.

PROJECTS

Inventory & Receiving Management System

- Developed full-stack features using Go, React, TypeScript, GraphQL, and PostgreSQL.
- Implemented inventory, receiving, grading, and shipping workflows.
- Designed GraphQL resolvers and database changes to support new business requirements.

VocalCalc (Voice-Activated Calculator)

- Developed a voice-activated calculator using Python and speech recognition, improving **accessibility for users with limited mobility**.
- Designed a user-friendly interface and seamless functionality, **reducing calculation errors by 20%** in testing.
- Enabled hands-free operation, enhancing convenience for **daily tasks**.
